**Urban Risks and Societal Resilience** is the theme of the second edition of the LNEC Lisbon Conference.

The conference goals are:

- Exploring science-based solutions and innovative approaches to manage systemic risks related to geohazards
- Identifying stakeholders' needs to inform research agendas on fields related to urban risk management and societal resilience
- Promoting stakeholders' involvement on the exchange of knowledge and expertise

The Conference will consist of three half-day technical-scientific sessions on:

- 1. Geohazard risk assessment**
- 2. Urban risk management**
- 3. Building societal resilience**
